

Tuttles all the way down

Dr Leda Glyptis | @LedaGlyptis
February 2021

The problem of infinite regress

A sequence of reasoning of
justification which can never come to
an end.

Also...

This is not a typo...

Harry Tuttle stars in the 1985 dystopian film Brazil which is about true love and creative plumbing.

Tuttle is a rogue engineer who wants to fix real plumbing problems without the paperwork.

Remember that. We will need it later.

Where does banking come into this?

**The unchanging stripes of leopards and the
myth of inevitability.**

We are who we are

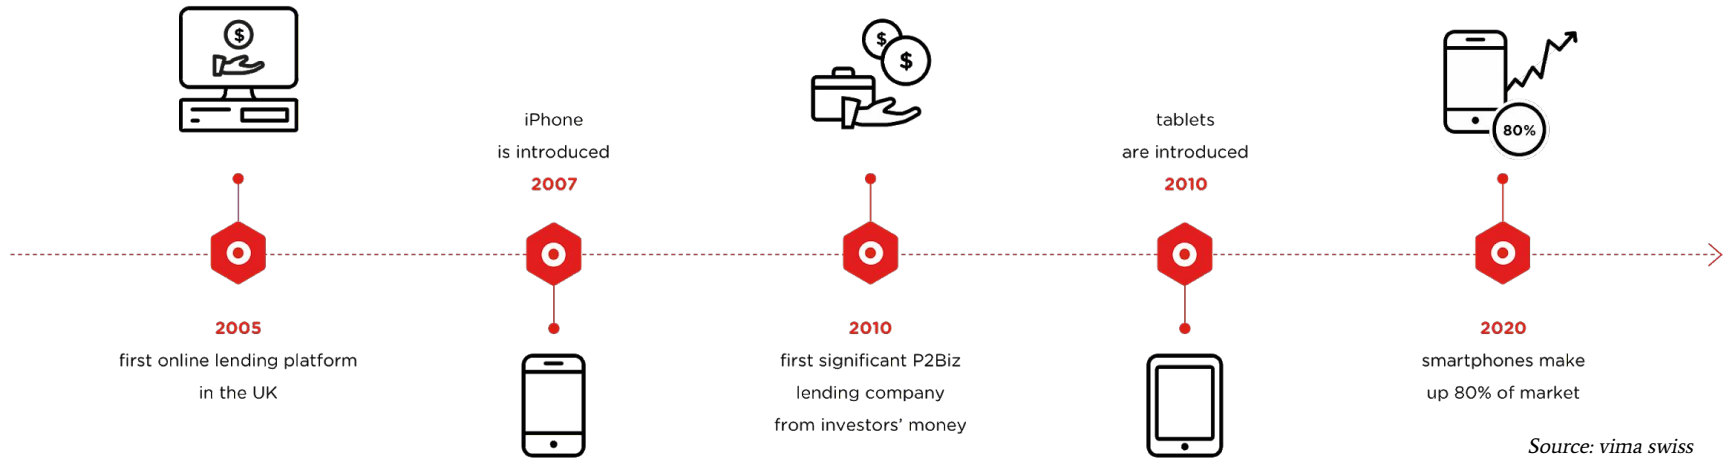

We are in control

The future is coming

Then 'fintech' happened.

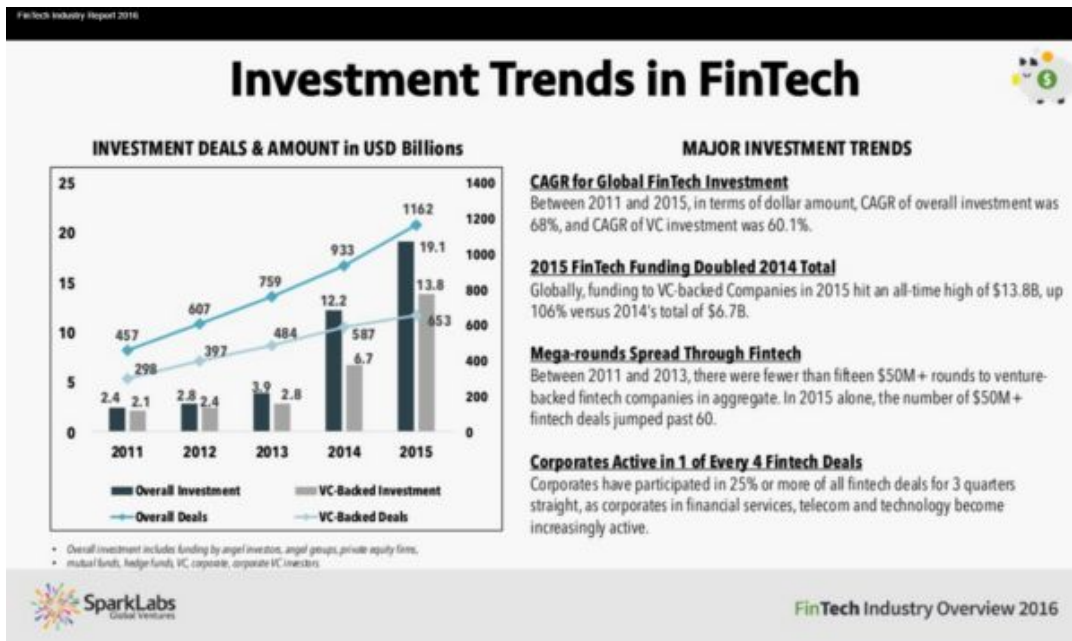

Enter left: a period of lasting and profound disruption.

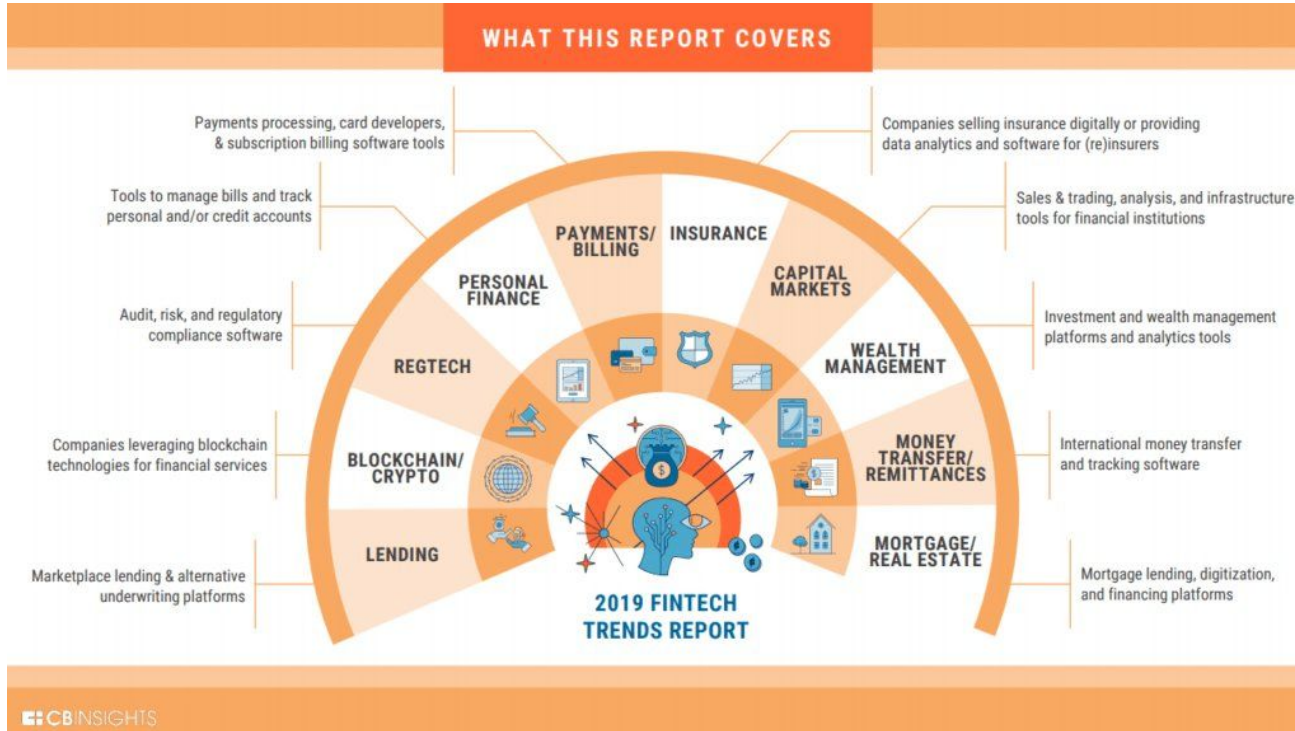

Where do turtles come into this?

Trend guessing... or...
Looking for the Turtle at the Far End of all the
Turtles.

Who is spending what...

Who is 'disrupting' what...

Where is it all happening...

38 fintech unicorns valued at \$144.87B

Global VC-backed fintech companies with a private market valuation of \$1B+ (01/09/2019)

Predictions getting vaguer, and scarier.

0% 15% 30% 45% 60% 75%

2 Key digital technologies that fintech plan to invest in in the next 12 months

ASSET MANAGEMENT TRENDS IN 2019

When the message is... 'do all the stuff'.

1

Investing in Technology

Savvy managers are improving operational efficiency by investing in modern tech.

3

Mobile Phone Use

Mobile phones can help you avoid the costly investment of scanner devices and may increase efficiency.

5

Universal Barcode Support

Universal barcode support saves time for users who would otherwise have to convert barcodes by hand.

7

Intuitive Admin Tools

System administrators will be able to create the best system for their team without help from vendors.

9

Internet of Things

Integration between your system and auto-discovery tools becomes more vital than ever before.

2

Cloud-Based Systems

The "Cloud" is dominating the software delivery model because of its flexible payment structure.

4

BYOD Policies

Bring Your Own Device (BYOD) policies help companies save on technology costs, though may complicate security.

6

User-Configurable Workflows

The ability for users to configure workflows reduces user dependency on vendors.

8

Big Data Analytics

Analytics will help managers sift through large volumes of data to make informed management decisions.

10

Secure Data Hosting

Companies are taking steps to ensure their SaaS systems are secure to prevent costly data breaches.

statista

Trending the trends: Eleven years of research

Turtles all the way down, after all.

Where do plumbers come into this?

**Knowing that a conversation is important
vs
Knowing what to do with it.**

Didn't exist in 2006

Sourced from @ValaAfshar

So what?

What has been the exam question:

innovation

/ɪnə'veɪʃ(ə)n/

noun

a new method, idea, product, etc.

plural noun: **innovations**

"technological innovations designed to save energy"

What we learned

New tech is real, scalable and exciting.

But it's not 'light touch': it requires new business models and robust infrastructure.

What we didn't learn

How to marry innovation to business imperative.

And have the hard conversations first.

What should be the exam question:

survival

/sə'vaɪv(ə)l/

noun

the state or fact of continuing to live or exist, typically in spite of an accident, ordeal, or difficult circumstances.

"the animal's chances of survival were pretty low"

Time for the leopard to change its shorts.

We are who we are

We must make choices

The party can happen without us

A changed world.

The regulator

Neither the 'what' nor the 'when' is in the FIs gift any more.

The market

Your competitors may be very much like you still, but the services your customers consume that are higher value than yours, are not like you in the slightest.

The customer

The customer knows better. And expects better. Because they have better. Just not from you.

The 'How': Tech

The 'what': your strategy.

Wait and see is a choice, but not a strategy.

The era of optionality needs to end.

The 'who': your Tuttles.

ALL MODERN DIGITAL

Choice

What happens next

Infrastructure

Economics

Brand permission

There is a catch

Innovation is a state, not a department

The need to stay relevant is constant and the pace of change relentless.

Infrastructure is a hygiene factor, not a differentiator

The proposition, pricing and go to market is where the battle is fought. And won or lost.

So...

What will you do next?

**If all else fails, start here:
Who is your organisation's Tuttle?**

Thank you for your time
