■ 11:00 – 11:05 Chairman's Introduction

■ 11:05 – 11:25 Keynote Presentation – Dr Victoria Hurth

■ 11:25 – 11:45 Question & Answer

Today's Speaker

Dr Victoria Hurth
Fellow of the Institute for Sustainability Leadership
University of Cambridge

Firms I know are increasingly looking to become purpose-driven:

- Strongly agree
- Somewhat agree
- Somewhat disagree
- Strongly disagree

Ensuring firms who say they are purpose-driven act in line with this is going to become an increasingly important governance and management agenda:

- Strongly agree
- Somewhat agree
- Somewhat disagree
- Strongly disagree

Rethinking Business – The Paradigm Shift To Purpose

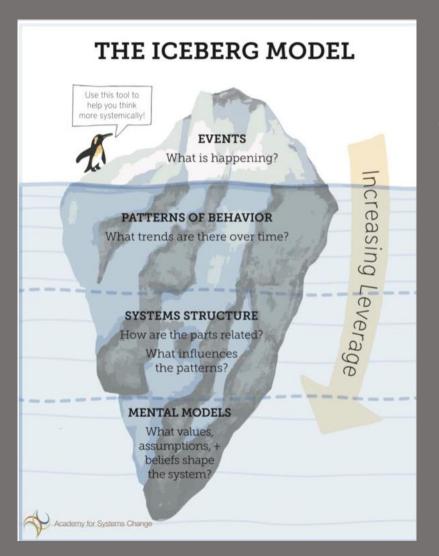

4 key points:

- 1) the firm outcomes you get depend on the decisions you make
- 2) the decision you make depend on what organisational logic dominates
- 3) three logics explain how far firms are likely to affect unsustainability and are able to respond to it
- 4) purpose is the logic fully aligned with a sustainable future and a Wellbeing Economy

4 key points as to why purpose isn't going anywhere soon:

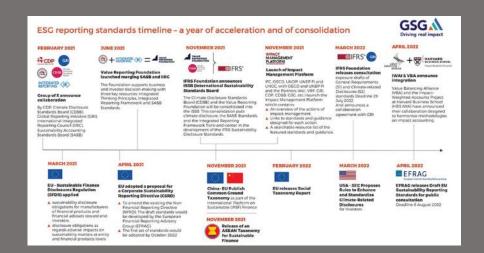

- 1) purpose is the practical, operational answer to the biggest problem we have ever faced (existential threat to our collective long-term wellbeing/unsustainability). Unless we solve the problem, purpose will attract more and more energy
- 2) purpose resolves tension and pain at the heart of business while it is misaligned with the future we want which are only going to get worse
- 3) purpose is the only business logic that truly unleashes the innovation of an enterprise to solve our issues and create the positive world we want

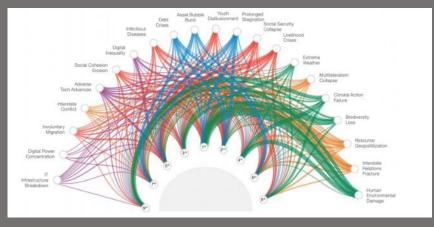

If you want to go far and fast, you need to go deep:

Some just see a swathe of
ad hoc events and new
regulation like ESG
reporting and are buffered
around by them

This is where the change is really unfolding, even if most don't realise it yet

the economy is purpose-driven

an economy is about allocating scarce resources to optimise wellbeing (welfare/flourishing/prosperity) for society over the longer-term

wellbeing:

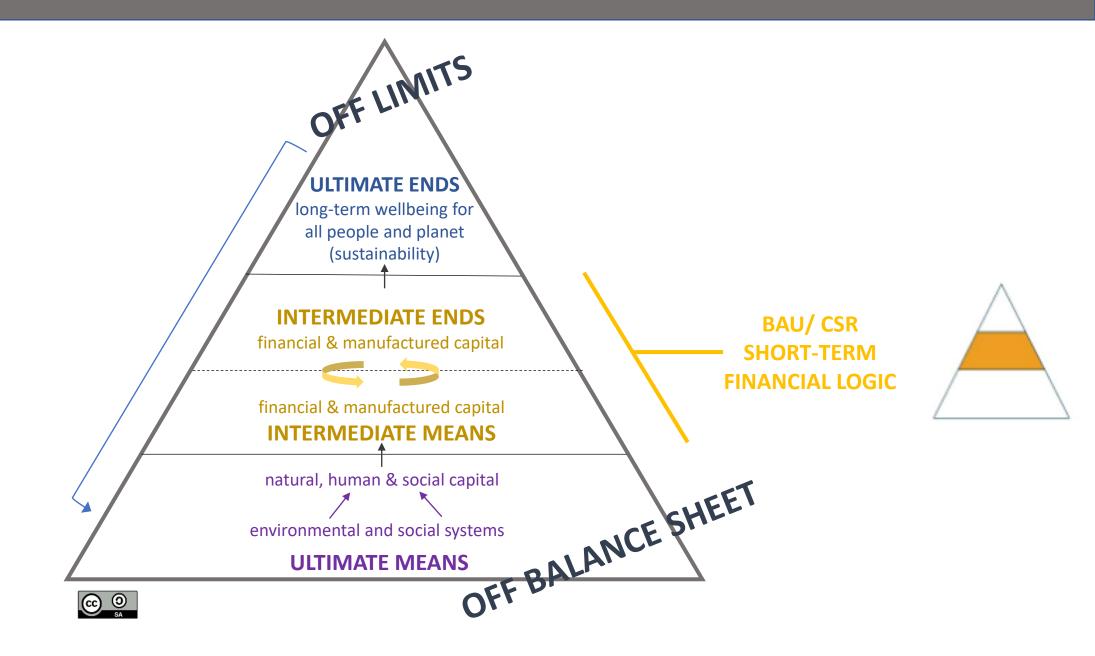

positive state of being where current and future needs are met, such that there is the capacity and opportunity to flourish

- NOTE 1 Wellbeing is also referred to as "flourishing" or a "good life".
- NOTE 2 Wellbeing exists at the individual, household, country and global level and can be applied to people and nature, and to individuals and systems.
- NOTE 3 Wellbeing can be assessed by subjective and objective measures.
- NOTE 4 Wellbeing can be achieved on varying timescales and to varying degrees.
- NOTE 5 Sustainable development underpins the achievement of wellbeing for all people and planet.

[SOURCE: BS 8950:2020, 3.7, adapted]

Sustainable development: "development that meets the needs (*wellbeing*) of the present without compromising the ability of future generations to meet their own needs" (WCED 1987)

the unsustainable economy – Business-as-Usual/CSR logic

WELLBEING CREATION: wellbeing is optimised for society **automatically** as a direct consequence of companies engaging in competitive focused, self-interested profit maximisation for itself/shareholders

HUMAN BEHAVIOUR: customers and companies are (boundedly) rational – they can and will act in their own self-interest and are financially motivated (because money buys wellbeing in the market place).

RULES OF THE GAME: Obey the law (compliance orientation). Focus on accurately reading customer demand – not questioning or seeking to change it and government will sort out the rest. Basing decisions on competitive behaviour will limit negative issues of self-interest

the rise of unsustainability

unsustainability science and data

stakeholder pressure

threats to reputation

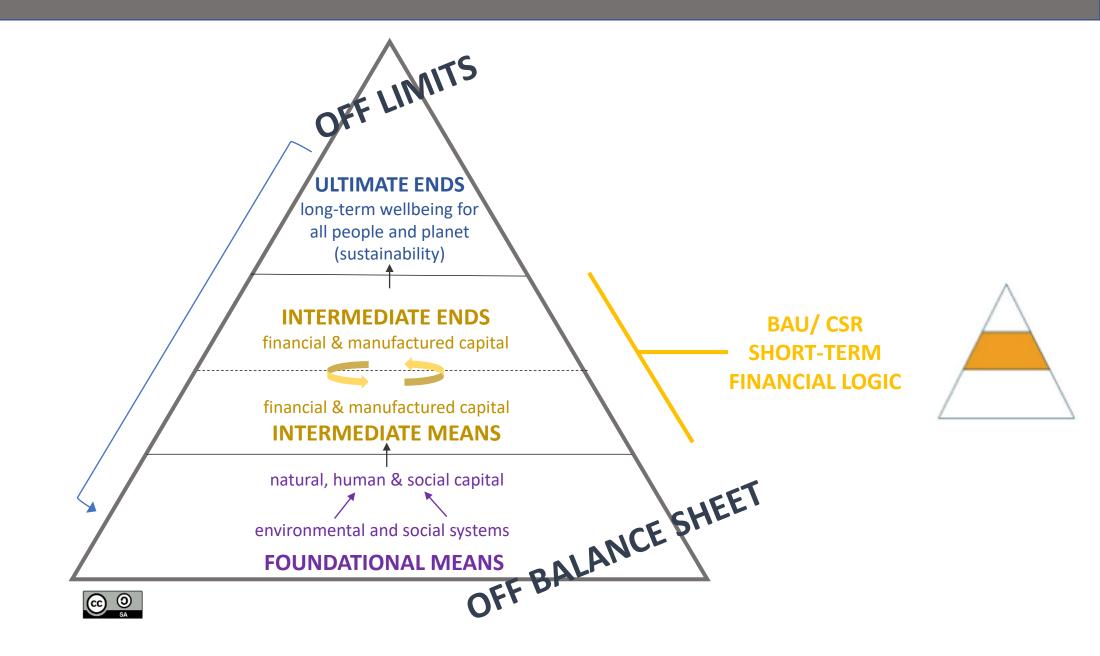

the ability to respond depends on the firm logic

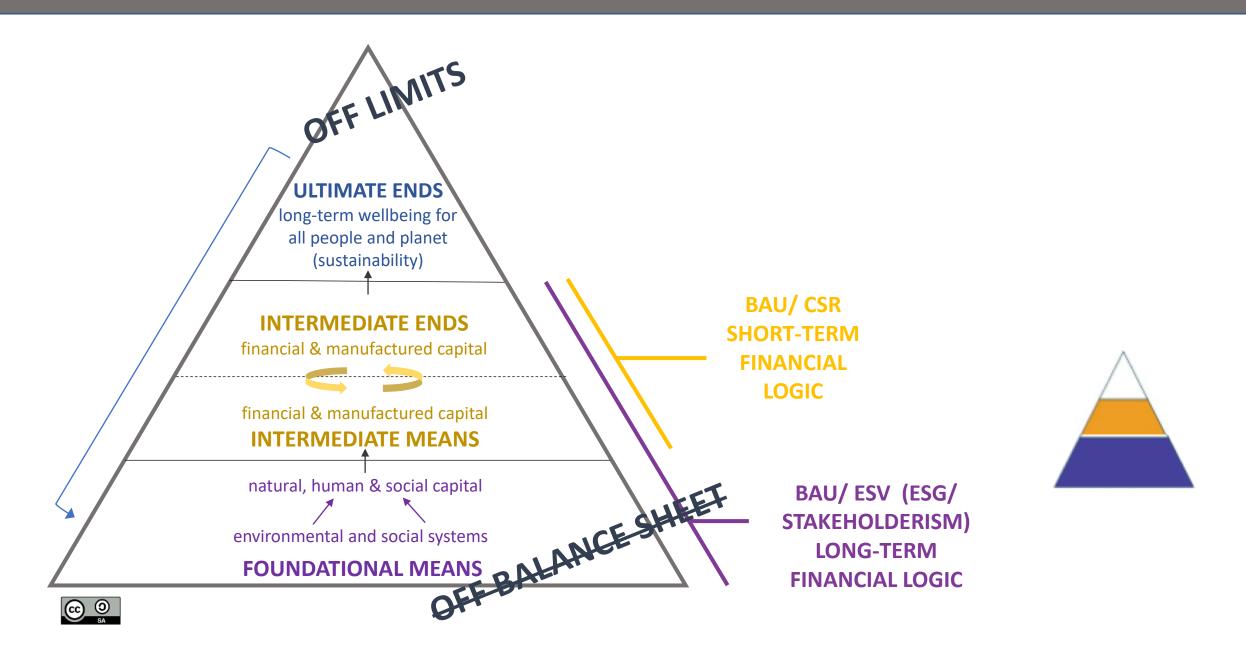

CSR ESV PURPOSE

PAS 808 Purpose-driven organizations – Worldviews, principles and behaviours for delivering sustainability – Guide

the sustainable economy – purpose-driven organisations (PDOs)

(organizational) purpose

an (organization's) reason to exist that is an optimal strategic contribution to the long-term wellbeing of all people and planet

PDO Worldviews

Ends

Wellbeing is the ultimate objective Success is long term Equality, equity and citizenship are end goals

Means

Humans are dependant and interconnected with nature Humans are inter-dependent

Method

Ethical norms exist and should be applied with care
Effective decisions are made with the whole system in mind
Humans act best when treated as other-serving
We need to innovate with urgency, creativity and prudence

PDO Principles

Wellbeing Ends

- 1. META-PURPOSE: Long-term wellbeing for all people and planet is the ultimate goal, and all people and planet are the ultimate beneficiaries
- 2. PURPOSE: The purpose, achieved in the right way (means and method), is the strategic and accountability anchor

Healthy Means

- 3. FOUNDATION: A fair and adequate contribution to the health of the means is non-negotiable
- 4. ENABLERS: The value network is understood, cared for, integrated with and aligned

Wise and Ethical Method

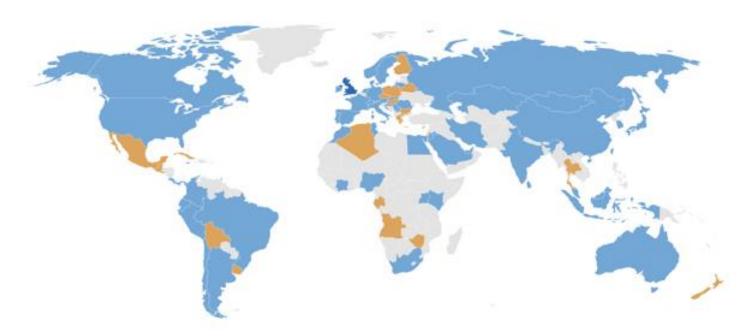

- 5. VALUES: Stated values are authentic, legitimate and lived
- 6. INNOVATION: There is boldness towards the ends and precaution towards the means
 - 7. KNOWLEDGE: The best evidence is sought and relied on

PDO Behaviours

Characterising marketing paradigms for sustainable marketing management

Victoria Hurth, University of Plymouth, UK* Emma Whittlesea, University of Plymouth, UK

ABSTRACT

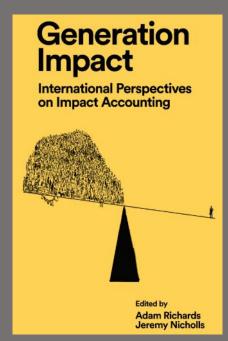

Purpose

Economic theories shape marketing paradigms, and these, in turn, can either aid or inhibit marketing managers' abilities to contribute to the goal of sustainability – long-term wellbeing for all. The marketing paradigm drawn on is therefore of great importance. Macro sustainable marketing literature does a good job of problematising the influence of neo-classical economic thinking over marketing, but translation and broader exploration of this problem, in a way that can be used to positively transform marketing management at the meso level, is lacking. This paper's purpose is therefore to characterise three key marketing paradigms which draw from three economic theories of the firm – two of which are likely to hinder sustainable marketing, and an emerging paradigm which is judged as compatible.

Design/methodology/approach

This is a concentual paper which provides the basis for future empirical testing
